Before and after proposal visualisations showing new canopies and decorative cladding.

Business Park Refurbishment - Concept Proposal

Ref : WDL28

Project Type:	3D visualisation and concept design
Value:	£3m
Involvement:	Client liaison 2D presentation drawings 3D visualisation Contractor liaison

Workplace Designs were appointed to produce a concept design scheme to modernise this under utilised business park on the outskirts of Bristol. The team assessed the estate in comparison to the nearby competitors to put together a cost effective design to make the park more desirable to new tenants.

The designers brought together products from various different suppliers to produce mood boards of potential products and finishes to include lighting, furniture, flooring and planting options.

3D images were developed to allow the client to visualise how the different buildings could be treated with additional lobbies and decorative cladding.
