What we did

After a successful refurbishment of the 1st floor office, WDL was appointed by the same client to provide a full PM & Design service role for their expansion into the ground floor accommodation.

The extent of the work included a full refurbishment of the dilapidated space and the atrium as well as a high spec link staircase between floors. WDL designed & manufactured all of the free-standing joinery as well as all FF&E elements. The project was completed on time, within budget and again with amazing feedback from our Client.
